Re: Docket # 98N-1038
Labeling for FOOD IRRADIATION

Hello,

Mandatory, clear labeling of irradiated foods is essential.

As a consumer, I value informed consent. People must have the choice, and we cannot wisely choose unless foods which are irradiated are clearly marked in conspicuous lettering (not too small) and with the word "irradiated" (ie no cleverly disguised words such as "cold pasteurization")

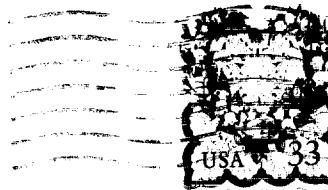

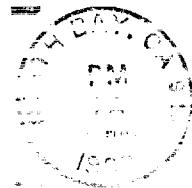

I am strongly opposed to food irradiation. If companies must do it, please clearly inform consumers so they have the right to choose

98N 1038

Sincerely,
ASOSBORN
